DETAILED ACTION

1. Receipt is acknowledged of Applicant's response filed 12/23/2008 in reply to the Office Action of 08/01/2008.
2. Amendments to claims 1 to 5, 9 to 22 and 26 to 34 are noted.

Allowable Subject Matter

3. Claims 1, 17, 18 and 34 are allowed.
4. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 17, 18 and 34, prior art fails to disclose or make obvious, a method or apparatus for generating a plasma (as a source of radiation) by irradiating a pulsed laser on a material and fine particles are generated by irradiation of a short pulse on a material and under an air flow (and is different from particles mixed in a liquid). Prior to irradiation by the main laser, droplets are heated by a weak laser or infrared rays and vaporized to form a "particle-cluster" which is a type of secondary particle that is formed by a large number of fine particles which have sub-micron diameter and are bound together by a binder that vaporizes at a temperature lower than the melting point of the fine particles. Since the solvent of the droplet is vaporized, the diameter of the droplet reduces while the density of particles is increased. Hence the main laser can heat the particles to generate the plasma without being blocked by the solvent (a large fraction of the droplet is the solvent) and the plasma generation becomes more efficient. Further, particles in the particle-cluster can be dispersed by giving then a shock prior to irradiation by the main laser, so that the particles are dispersed uniformly into a wide

space. Since the solvent is vaporized prior to entering the vacuum chamber for plasma production, this method avoids degradation of the vacuum and also prevents contamination of the vacuum chamber.

Close prior art by Richardson et al. (US 6,831,963) fails to disclose vaporizing the solvent prior entering the vacuum chamber. Hertz et al. (US 6,002,744) also fails to disclose this feature of the instant application.

5. Claims 2 to 16 and 19 to 33 are allowed by virtue of their dependencies on claims 1 and 18.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
